

Project Title: Enhancing the Nuit Blanche Toronto Visitor Experience 2025

Project Overview: Nuit Blanche Toronto is an annual, city-wide, all-night celebration of contemporary art, transforming public spaces into immersive art experiences. This project invites multidisciplinary student teams to conceptualize and design innovative solutions that enhance the visitor experience for Nuit Blanche Toronto 2025. The goal is to create seamless, engaging, and accessible interactions before, during, and after the event by integrating digital and physical experience technologies. They would like to improve on the current digital and physical systems they have in place.

Target Audience:

- Local residents and tourists attending Nuit Blanche Toronto
- Art enthusiasts, families, and casual attendees of diverse ages and backgrounds
- Visitors with varying levels of mobility and accessibility needs

Objectives:

1. **Pre-Event:** Simplify event discovery, planning, and navigation through intuitive digital solutions – what digital and physical engagements/experience can be created before the event
2. **During the Event:** Enhance on-site engagement and accessibility with interactive tools and technologies – both locations based, physical, and digital engagement support – how can you support visitors and organizers to create an engaging experience
3. **Post-Event:** Extend the experience through meaningful follow-ups, feedback collection, content sharing, immersive experiences that continue on beyond the 1 night event

Considerations:

- **Accessibility:** Solutions must cater to diverse abilities, technology access and knowledge, and ensure inclusivity for all attendees.

- **Sustainability:** Ideas should minimize environmental impact, supporting eco-friendly initiatives, be reusable for future festivals, and consider continuation after the event
- **Scalability:** Concepts should accommodate large crowds and varying city locations, and situations – quiet, loud, crowded, individual, groups, etc.
- **Engagement:** Focus on creating interactive, informative, immersive, and memorable experiences.

Success Metrics:

- Improved event navigation and visitor satisfaction
- Increased engagement through digital and physical touchpoints
- Positive feedback from diverse user groups

Review previous Nuit Blanche experiences – both physical and digital experience, and also other similar festivals to explore the challenges and opportunities.

Resources:

- Nuit Blanche Toronto official website: [Nuit Blanche Toronto](#)
- Case studies of similar art events and festivals
- User research tools for surveys and feedback collection

Final Note: Students are encouraged to explore innovative ideas that blend technology and art to create a cohesive and impactful Nuit Blanche Toronto 2025 experience. Consider how each stage of the visitor journey can be enhanced to make the event more inclusive, engaging, and memorable.
